Welcome

Antitrust Statement

The fundamental principles of the ISCOs include strict respect for, and compliance with, all relevant national and international laws and conventions, particularly compliance with current antitrust regulations under European and national competition law.

In order to ensure compliance with antitrust law, sensitive business information must not be discussed. Nor must there be any agreements regarding prices, sales control, production volumes, market sharing, boycott calls and/or calls for non-cooperation with third parties, regardless of the reasons for such agreements.

As a consequence, there must be no discussion of current or future prices, profit margins, discounts, the timing and level of envisaged price increases, costs, capacities, customers, suppliers, product or marketing plans, sales forecasts, borrowing terms or any other information that is sensitive from an antitrust point of view.

The discussion and exchange of information that is relevant in terms of competition is not only prohibited during sessions but also during informal conversations at which competitors are present.
